John Philip Paz Front End Developer

johnphilippaz.yso@gmail.com | +63 (956) 679-6478 | 018 Rose street, Sulivan, Baliwag city, Bulacan, Philippines

Summary

Full-Stack Software Engineer with strong expertise in modern frontend development, specializing in **React.js, Next.js, Nuxt.js, and TypeScript**. Experienced in building scalable, high-performance web applications with a focus on clean architecture, responsive UI, and excellent user experience. Strong backend development background with **Node.js, ASP.NET Core, and Django**, including API design, database integration, authentication, and cloud-based application development. Experienced in integrating AI capabilities into applications using **Python, TensorFlow, Pandas, and machine learning workflows**. Passionate about creating efficient, maintainable software solutions and leveraging modern technologies to solve complex engineering challenges.

Professional Experience

Front React, Next Developer, *Stone Bus* 2025 – 2026

- Built a scalable collection of reusable UI components, hooks, and frontend utilities that improved code maintainability, reduced duplication, using React.js, Next.js, and TypeScript, reducing development effort by 10% and accelerating feature delivery through standardized UI patterns.
- Collaborated with product and design teams to identify usability bottlenecks and implemented UX improvements using Tailwind CSS and modern UI principles, redesigned key application workflows and user interface elements based on usability analysis, improving user experience and increasing user retention.

Sr. Laravel Developer, *TatvaSoft* 2022 – 2024

- Designed and developed a RESTful API using Laravel, enabling seamless integration with mobile applications and external systems, leading to increased efficiency and productivity
- Streamlined development processes by implementing debugging and automated testing frameworks like PHPUnit and continuous integration tools like Jenkins, resulting in faster development cycles and improved code quality
- Collaborated with clients to gather requirements and deliver tailored PHP solutions, achieving a 95% client satisfaction rate and repeat business

Javascript, PHP Developer | Data Science, *Wild Union* 2019 – 2020

- Designed relational database schemas with optimized table structures, foreign key relationships, data validation rules, and migration strategies to ensure data integrity and support future application growth.
- Converted Figma designs into pixel-perfect, mobile-first responsive applications using React, Next.js, and Tailwind CSS, ensuring consistent UI behavior across browsers and device sizes.
- Designed and implemented server-side functionality using PHP, including business logic, form processing, authentication, and database integrations.

Junior Machine Learning - Web Developer, *Freelancer* 2018 – 2019

- Learned Pandas and NumPy, processed and analyzed datasets using them, developed machine learning workflows for prediction and data analysis.
- Refactored legacy codebases and improved application architecture to increase scalability and long-term maintainability, integrated AI functionality into a production-style web application.

Education

Bachelor of Science in Information Technology, *Baliwag Polytechnic College* 2012 – 2017

Skills

Frontend Development

- React.js, Next.js, Nuxt.js, Vue.js, Angular.js
- JavaScript, jQuery, TypeScript
- HTML5, CSS3, Sass, Tailwind CSS
- Redux, Zustand, Context API
- React Query, REST API Integration
- Responsive Design, UI/UX Optimization

Backend Development

- Node.js, Express.js
- Laravel, PHP
- ASP.NET Core / C#
- Django / Python
- RESTful API Design
- Authentication & Authorization (JWT, OAuth)
- Microservices Architecture
- WebSockets

Database

- PostgreSQL
- MySQL
- MongoDB
- Redis
- ORM: Prisma, Entity Framework, Django ORM

AI / Machine Learning

- Python
- TensorFlow
- Pandas
- NumPy
- Data Processing
- Machine Learning Fundamentals
