

Jason Edward

Web Developer (JS, CSS frameworks)

✉ edwardjphp971@gmail.com 📍 Sullivan, Baliwag city, Bulacan, Philippines

Summary

Web Developer with 9+ years of experience, specialized in React, Next, Tailwind CSS, Deep knowledge in C#, ASP, Node, And strong database management algorithm

Interested in other programming languages and have some experience on them. (PHP, Bootstrap, Data science, Solidity, iOS ...)

Love challenges and solving issues. Enjoy gardening in spare time.

Professional Experience

05/2023 – 07/2025

Web Developer / Designer

- Re-designed inconvenient design collaborating 2 designers, improved 13% of user engagement through design iterations based on user feedback
- Built and deployed RESTful APIs, integrating key third-party solutions that expanded website functionality, never allowed any warnings and errors, implementing perfect functionality, maintained lightning loading.
- During the tenure, responsible for designing and developing complex web applications, including an e-commerce platform and internal management systems, leveraging HTML, CSS, JavaScript, PHP, and Node.js.

10/2017 – 12/2022

Freelancer

- Created machine learning models for classification and prediction tasks learning TensorFlow and Scikit-learn.
- Gained hands-on experience in developing desktop and web applications using C# and the .NET Framework, made a simple desktop app and small profit.

08/2017 – 03/2021

Jr. Next Developer Role.

- Developed and maintained responsive web applications using Next.js and React, improved lazy load by 7% through code optimization (reduced re-rendering integrated various hooks features)
- Developed and integrated 5+ reusable React components with TypeScript, reducing code duplication and saving an estimated about 70 hours of development time.
- Integrated RESTful APIs with front-end applications, handling authentication and data management for e-commerce platforms, implemented pixel-perfect designs

Education

2011 – 2015

Bachelor's Degrees
University of Luzon

Skills

Front-End side:

React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material-UI, Redux, Context API

Back-End & DB:

C#, .NET Framework, ASP, Entity Framework, SQL Server, Node, Mongo, Cloud Service(AWS, ..)

Others:

Object-Oriented Programming, Agile Methodologies, Version Control, Debugging & Troubleshooting
